

# Cross River Fishing Evaluation—Data Collection Form

NAME: \_\_\_\_\_

DATE: \_\_\_\_\_

**REACH #**

**What** information would you need to create a map?

**How** could you gather this information?

**Draw or list** characteristics of fish habitat.

## Aerial Photograph

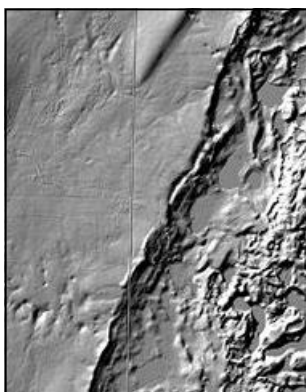

Describe your initial observations: What can you see on the aerial photo?

What can you infer about the river from the aerial photo?

What additional information do you need to identify potential fishing locations?

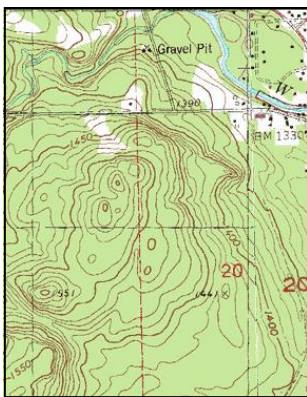

## Hill Shade Map

Describe your initial observations: What can you see on the hill shade map?

What additional information have you learned about the river?

What additional information do you need to identify potential fishing locations?

**Contour Map**

Describe your initial observations: What can you see on the hill shade map?

What additional information have you learned about the river?

What additional information do you need to identify potential fishing locations?

**Wrap-up:**

- a) Does your field data suggest possible fishing habitat?
- b) What specific evidence supports or eliminates areas within your reach as possible fish habitat?
- c) Would you be able to easily access this area? How do you know?
- d) Did the images and data confirm or change your image of the reach from interpreting the maps and graphing the slope?
